

◆◆Introduction of the speaker on 126 GIS FORUM TOKYO Joint Forum◆◆

2022/12/6(TUE)

Mr. Kacper Radzikowski

Rococo Co., Ltd.

PhD in Information Technology, Warsaw University of
Technology

PhD in Information Technology, Waseda University

[Speaker Profile].

2015 Came to Japan under the International Student Support Scheme of Rococo Co., Ltd. and entered the Graduate School of Information Production Systems at Waseda University, specialising in natural language processing and machine learning. Noted that cloud-based speech recognition is trained on pronunciation data with English as the mother tongue, resulting in low recognition accuracy for non-native English pronunciations. He developed algorithms to convert native accents. Apart from natural language analysis, he has experience in image analysis for medical applications, speech analysis and emotion recognition for customer support projects.

Certified Enterprise Architect TOGAF 9 in 2022, attended Open Group Edinburgh conference, now he responsible for the security architecture of the 5W1HS framework for quality assurance in O-DA2.
