

***JF ANNUAL REPORT Business:***

***(1) ReGIS Inc. Activities;***

***(A) Mail Magazines;***

*We had published in 2012, 24 GIS FORUM Members News Letters “#367 to #390 ( Mail Magazines & Prints each 20-30 pages & per version)*

***(B) 4 GIS FORUMS;***

- #78 focusing on “Smart applications” in February, inviting Dr. Vania Joloboff.
- #79 “Open Summit” in April, inviting Mr. Allen Brown.
- #80 “CRM Summit” in July, inviting Mr. Chris Forde.
- #81 “Architecture and Airline business towards Cloud operation” in December  
Inviting Mr. John Maddison, from UK, consultant to Amadeus, IBM, ANA,  
and JTB.

***(C) 5 TOGAF Practitioners Seminars (4Days);***

We certified 78 architects this year on TOGAF 9 and all together certified members became 472 people cumulatively.

March	TOGAF 9 Course #10 NTT Customized course
May	TOGAF 9 Course #11
August	TOGAF 9 Course #12
November	TOGAF 9 Course #13 HITACHI Customized Course (1 day)

***(2) The Open Group Activities;***

We learned the absolute need of “dependability” of System by devastating 311 tsunami and nuke disasters in 2011.

In The Open Group overseas activities, 2012 attended

January,	SFO Conference,
April,	Cannes Conference,
July,	WDC Conference,
October	Barcelona Conference,

All of my focus was on “dependability and Clouds”.

Dependability through assuredness and JF slogan of ABCDEF-J started 2006 much on formal methods and most recently all work in now focused to make “Open Systems dependability” standardization as an Assurance process as a team of DEOS led by Dr. Mario Tokoro. This effort had been enhanced from last year of 311 lessons.

In 2013, I will be come back for last week of January in LA again to attend The Open Group New Port Beach conference ,where in Real Time Embedded System Forum of The Open Group, we, The Open Group Japan and Japan Science and Technology Agency project, DEOS team (Directed by Dr. M.Tokoro) are going to propose to the Real Time Embedded System (Dave Lounsbury, CTO; Joe Bergmann, Director of RTES) Dependable Assurance cases Standard as an “Architecture Based Compositional Dependability through Assuredness with Sufficient Evidence”(ABCD- Assurance with sufficient Evidence).

2013 April conference in Sydney Australia as a company review target by RTES members and July conference in Philadelphia are targeted to be the RTES Dependability Standard accomplishment is our target and London conference on October is back up plan.

**(3) CRM Associations Activities 2012**

Monthly CRM best practice Award winner presentations as an member only Education Workshop had been very successful assembled in Shinjuku CRM office and Weeded to members of local cities i.e., Hokkaido, Osaka and Nagoya.

One other successful Working group is on big data and business intelligence research on CRM and customer behavior...

In 2013, we do all the same activities as 2012 and add one new workshop on SNS Workshop and enhance Global activities.

- March, Publishing of 2011 Best Practice white Book
- May, Kansai CRM Forum in Amagasaki city, CRM Chubu forum in Nagoya
- June, Hokkaido CRM Forum in Sapporo
- July, CRM Summit in Tokyo 2012
- September, Mie CRM Forum in Ise city
- October, CRM 2012 Best Practice Awards announcement.
- November, CRM 2012 Best Practice Award presentation in Tokyo
- December, TOKYO Big site Demo by CRMA Japan at CLOUD FORCE JAPAN

**(4) Academic activities reviews;-2012**

January,	Formal Methods Seminars in Kumamoto –IPA program;
March,	Attending Annual meeting as a statutory Auditor of “World Economic research Association”
March,	Shinshu University Business School Graduation Paper session
April to July,	Weekly lecture on Venture Management (15 times of lectures)
April to	
December,	2 times a month attending Kyoto University Architecture Committee as Kyoto Univ. IT Advisor.
June,	Invited Speech “Architecture on Strategic Alliance-TPP” At Annual conference of System Audit Academic Association
November,	Invited Speaker “Architecture and dependability” ISSRE 2012 at Dallas

**(5) Buddhism Priest Activities;**

May,	Eitaikyo (Sutra reading service tradition) at Ryokeji temple , Echizen city
November,	Houonko;(Thanks giving services for St. Shinran) at Ryoukeiji temple; Please refer; Through Regis.com: <a href="http://www.re-gis.com/">http://www.re-gis.com/</a> Direct to Ryokeiji; <a href="http://ryokeiji.net/english/index.html">http://ryokeiji.net/english/index.html</a>

Buddhism Priest activity will be increased is getting much involved to help Cyber Temple Consultation work for all over Japan with our business framework starting from simple Web services to HP portal services and unique sites development.

2013 May	Eitaikyo (Sutra reading services)
2013 June 3 days	visits to Kanto St. Shinran’s sacred places
2013 November 3 <sup>rd</sup>	Jisokuin Mother’s 7 <sup>th</sup> anniversary services Houonkou (Thanks giving to St, Shinran)

2014 May or June St. Shinran’s 750 years anniversary and 400 th years Ryokeiji Foundation;  
Welcome visitors from abroad.

## ***Manifesto of JF ReGIS & The Open Group***

### ***Load to ABCDE Framework:***

#### ***(Architecture Based Compositional Dependability Ensuring Framework)***

Upon strong requirement from TOYOTA (who was The Open Group member) on Dependable Software in 2006, I started a series of discussions with Joe Bergmann, RTES Forum Director and John Anton, Board member at that time, and kick offed the presentation with Mr. Kazuaki Minami., senior project director on April 23, 2007 Paris, at the first day plenary of The Open Group conference with Katsutoshi Shintani, IPA Japan theming.

< The Bridge of Architecture and Implementation via Assurance of True Requirements >

(<http://archive.opengroup.org/public/member/proceedings/q207/23PL.htm#streams>),

I tried to bridge TOGAF of EA into much solution level of “Dependability architecture assurance” via Enterprise architecture, Solution architecture modeling, Assurance on Dependability, via formal V&V “Through assuredness with sufficient evidences” by transforming TOGAF into “ Computable TOGAF”.

After series of major project sponsors, Hitachi, Fujitsu, and NEC’s consecutive retirement from board member followed by Toyota’s business problem and change of Government from LDP, all supporters are gone except me..

But in 2011, luckily enough, I found Dr. Mario Tokoro, supported by Science and technology agency of Japan trying to make his 7 years project, DEOS to be open standard via ISO/IEC;

De jure standard as Open systems dependability of their Dependable Embedded Operating System .

So, from 2011, with the help of Dr. Shuichiro Yamamoto, Nagoya university, I started to bridge TOGAF ADM process with their Dependable Assurance Cases first as a RTES Standard.

Dependability Assurance case receiving the support both from academic and The Open Group CIO & CTO levels with biggest concerns on Accountability of performing the best possible appropriate management job.

In 2013, starting from Jan, in LA, conference, Ed Robert and I will dedicate our support at the Open Group conference, letting Mario, Shuichiro and Yutaka team to propose this Architecture based Compositional Dependability Ensuring Framework (ABCDEF) as the dependability assurance standards of The Open Group through RTES Forum.

(Fin)
